**MSC 2000:** 54D15, 54C08, 54C10

**Abstract**

$\theta$ - $g\delta p$ -continuity which are related to  $\delta p$ -normal spaces are presented. More properties of  $\delta p$ -normal spaces and almost  $\delta p$ -normal spaces are researched.

**Keywords:**  $\theta$ - $g\delta p$ -continuity,  $\delta p$ -normal space,  $g\delta p$ -closed set.
