

On some topics related to zero divisor elements of a ring

M. Tamer Koşan

Gebze Technical University, Turkey

emails: mtkosan@gtu.edu.tr; tkosan@gmail.com;

The aim of the talk is to discuss some important rings (for instance, McCoy rings, clean rings, exchange rings, fusible rings, reversible, eversible rings ..) in terms of zero divisors of them.

The talk is based on results obtained in [1,2,3].

MSC 2010: 16N20, 16U60

Keywords: Keywords1, McCoy rings, clean rings, eversible rings
